

Trapezoid shapes:

Trapezoids are available in a left or right shape orientation. To determine the shape orientation, view the trapezoid from the direction mounted/installed; shapes that slope down to the left are a Left shape orientation and shapes that slope down to the right are a Right orientation. The measurements needed when placing your order are: width/base, overall height, and leg height. The slope dimension/degree is not needed or required.

Cabana Door Hinge and Swing:

All doors are viewed from the direction of swing.
